### USEFUL WEBSITES

COCA announced on February 10, 2005 that a new tool to make construction safer in Ontario was launched by MOL. Successful construction companies know that a strong safety program is a key part of their business. Those companies make safety part of their everyday culture, and part of running a profitable venture. **The Safety Edge** is designed to help the small construction owner, develop a **plan** and then **make it happen**, to use proven safety and prevention strategies developed specifically for their sector. Go to link: <http://www.safetyedge.ca>

### WINTER DRIVING TIP

Don't forget to clear all outside mirrors, hood, roof and trunk, in addition to windows before driving away. Almost 1,000 people are killed in vehicle accidents every year in Ontario.
